

NAME	QUES.	POSITION	PARTY	COMMENT
Christmann, Randel	5	Senate	R	I continue to get conflicting messages form home school parents on this issue. Some feel that the tax credits are likely to bring along unwanted additional regulation.
Christmann, Randel	8	Senate	R	I would need clarification about what additional freedom is being requested. Some home school parents in my district have expressed satisfaction with our system as it is and a reluctance to tamper with it.
Christmann, Randel	13	Senate	R	I don't believe we need legislation to allow student led prayers. It is my understanding that the courts have only prohibited school led prayers, but student led prayers still are allowed as free speech.
Dietrich, Don	7	House	R	I cannot support state funding for pre-kindergarten.
Disrud, Rachael	1	House	R	This matter has been handled by the state of ND and, when we protect the unborn, we also need to protect the children that have been born - ensuring them safety, security and protection from harm. This is a responsibility that adults who protect life need to be aware of as we advocate for protecting children before natural birth. I am very concerned about protection of children, both the born and unborn.
Disrud, Rachael	2	House	R	I do as long as we understand the importance of reaching out to children whose lives have been affected by rape, incest, and situations that steal their innocence.
Disrud, Rachael	3	House	R	This matter is very touchy as there are children who have been deemed 'unadoptable' because of age, special needs, abuses and other reasons who need a loving environment and protection. Causing these children to grow up institutionalized creates new issues that we as conscientious people and Christians have not addressed. If someone wishes to give a child who has no place to be, food , shelter, education and safety, who am I to say they cannot do this? Some matters are matters of conscience and need to be matters of society, church, character building, strong neighborhoods, and training so that we provide a society that honors family values.
Disrud, Rachael	4	House	R	I wish that we had a society where God's laws were followed but we do not and cannot legislate beliefs. Some people without heterosexual orientation choose to live celibate lives and serve their God and community. We can love as Jesus loved without condoning what we do not believe in.
Disrud, Rachael	5	House	R	I believe a parent has the right to educate at home but if we are going to separate church and state, how do we pay them for their choice? This is a personal choice. We do have the opportunity for home schoolers or take some public school classes, participate in athletics, use some bussing and received special education services.
Disrud, Rachael	6	House	R	No religion should be banned from teaching and Christianity must be included.

Disrud, Rachael	7	House	R	At this point in time, it is ok to make it voluntary. Children are becoming socialized, learning to read and internalizing values at this delicate age. I hope the children who will benefit the most will be able to be in pre-kindergarten where their music, physical abilities, reading and interactions can be developed so they become productive and conscientious adults.
Disrud, Rachael	8	House	R	I realize that most home schooled children do exceedingly well. Therefore, achieving standards to enhance their learning should not be a threat.
Disrud, Rachael	9	House	R	I certainly hope we do not have to increase taxes in the near or far future. We need to be responsible in how we account for our spending. I do not see a tax increase on the horizon and would not vote for one.
Disrud, Rachael	10	House	R	The question is how to care for the babies that are born. This is a huge issue for Christians with a conscience. We must look at each issue with the heart of Christ. Illegal immigration issues are serious and those who are trying to better themselves need a route. Those who are criminals need to be dealt with as such.
Disrud, Rachael	12	House	R	We have the opportunity to do research through legal means such as through umbilical cords, placenta, etc without creating new embryos to achieve desired research.
Disrud, Rachael	13	House	R	We pray all the time, silently and out loud. If we say there must be one kind of prayer, other religions will request equal time. I wish the person praying could decide and, at the same time let it be known he/she respects the prayers of others. We know about Jesus but can turn others against our faith when we do not reach out with the love of Jesus. Jesus said that others will know him through our love of him.
Fong, Cory		Tax Commis	R	After reviewing the survey, I found that all but one of the questions are beyond the scope, authority, and responsibility of the office I hold and to which I am seeking re-election. Rather, the questionnaire seems to be more applicable to candidates seeking federal and state legislative office who may be asked to cast votes on specific legislative proposals of interest to the association. Therefore, I did not respond to those questions. You will notice, however, I did respond to the one question related to taxes.
Goehring, Doug	9	ure Comm	R	With exception of required services which need to be provided.
Grindberg, Tony	1	Senate	R	and incent and rape.
Hanson, Keith	4	Senate	LIB	I don't think marriage should be any of the government's business.
Hanson, Keith	5	Senate	LIB	I didn't know that there laws preventing them from adopting. I don't think they should be discriminated against based on the sexual orientation.
Hanson, Keith	8	Senate	LIB	I think they can say it if they want to. I also think that anyone that doesn't want to recite the pledge should feel compelled to do so.
Hanson, Keith	9	Senate	LIB	Spending cuts are the first things that should be looked at.
Hanson, Keith	10	Senate	LIB	I think we need to limit publicly-funded benefits to everyone.

Hanson, Keith	12	Senate	LIB	I would support a ban on all taxpayer funding for any kind of research.
Hanson, Keith	13	Senate	LIB	I don't see why legislation is needed. All people should free to do what they want as long as what they do doesn't harm others and they don't interfere with others rights to do the same.
Hanson, Keith	14	Senate	LIB	Everyone has basic fundamental rights whether or not they are an American citizen.
Headland, Craig	11	House	R	It would depend a lot on what they would be asking to do.
Heilman, Joe	1	House	R	Also, in certain cases of rape and incest.
Heilman, Joe	8	House	R	In general, yes, though I need to see the bill.
Heilman, Joe	9	House	R	This depends greatly on the areas that would be cut.
Heilman, Joe	12	House	R	I would like more information.
Heilman, Joe		House	R	While I may indicate that I support or oppose the general concepts above. I cannot commit to support or oppose any bill without first reading it and hearing/reading testimony from committee hearings. No issue stands entirely alone and all bills must be considered within the context of the legislative session.
Hoeven, John	1	J S Senatc	R	The only exception would be under Medicaid where funding is allowed to save the life of the mother.
Hoeven, John	5	J S Senatc	R	I do not think legislation is needed in this area.
Hoeven, John	6	J S Senatc	R	I believe all people should be treated equally and fairly but not given special status based on sexual preference.
Holmberg, Ray	1	Senate	R	I believe an exception must be made regarding the health of the mother and in those rare cases of rape or incest.
Holmberg, Ray	8	Senate	R	My granddaughter was homeschooled grades 3-8 and did fine under current laws.
Holmberg, Ray	10	Senate	R	Would have to be constitutional.
Holmberg, Ray	13	Senate	R	I think that under current court rulings such a law would be unconstitutional and cost taxpayers money to defend in a losing effort.
Klemin, Lawrence R.	8	House	R	However, we still need some oversight to ensure that homeschooled children are receiving a quality education, particularly in fundamentals.
Klemin, Lawrence R.	10	House	R	I don't want to see public funds used across the board for illegal immigrants, but there should be consideration given to humanitarian support for those who are hungry or sick. Consequently, I can't give a broad yes or no answer to this question.
Koppelman, Rep. Kim	8	House	R	General note on questions pertaining to "legislation " or "bills": While I make it a practice not to comment on support for or opposition to specific bills, until I've read the actual bills, these are answers based in principle, which is what it appears you are seeking. Of course, each particular bill would have to be read and analyzed before issuing specific statements of support or opposition.

Koppelman, Rep. Kim	12	House	R	North Dakota was one of the early states to ban human cloning--a bill which I sponsored and which received overwhelming legislative support.
Laffen, Lonnie	4 & 6	Senate	R	Do not understand this question.
Lee, Judy		Senate	R	I do not support or oppose bills of any sort, until I have read them and they have had hearings. Unintended consequences must be considered in all areas of legislation when bills
Lyson, Stanley	3	Senate	R	I just have a hard time to believe that the child would have the right guidance when talking about sex.
Lyson, Stanley	4	Senate	R	I believe that living in the U.S. gives you the right to choose what your sexual preference is, however, giving them civil rights status is a long shot for me.
Lyson, Stanley	5	Senate	R	I believe that parents have the right to educate their children at home or in religious schools. I have a hard time giving them tax relief because we would open a door for those that don't have children to want some kind of tax relief.
Lyson, Stanley	6	Senate	R	I don't know what (intelligent design) is. Without knowing what it is I couldn't say if I could support it.
Lyson, Stanley	7	Senate	R	I have a hard time taking pre-kindergarten children away from their home and family any sooner then is necessary. Parents are the best to guide their children being in a kindergarten class and how long they should be there.
Lyson, Stanley	8	Senate	R	As long as the parents teach them by the subjects approved by the state.
Lyson, Stanley	9	Senate	R	This is a question that can't be answered as you state it. In most cases I would support spending cuts. There maybe times that tax increases would be necessary.
Lyson, Stanley	12	Senate	R	This is a hard question, however, with what we know about this research I would not support it.
Mathern, Tim	3	Senate	D-NPL	Decision based on needs of children, for example, one issue is number of families available for number of children needing home.
Mathern, Tim	4	Senate	D-NPL	Each person should have access to food, shelter, education, health care and a job.
Mathern, Tim	6	Senate	D-NPL	I do not understand the question or implications. Please provide me with more information.
Mathern, Tim	8	Senate	D-NPL	I support a balance where families who meet education needs of their children are also granted freedom.
Mathern, Tim	9	Senate	D-NPL	I support balance of taxation with real citizen needs. Each instance must be weighed. For example, emergency service fire protection has reason for tax support and first class travel service for government officials does not.
Mathern, Tim	10	Senate	D-NPL	I would seek input from faith and nonprofit leaders about the needs and decide on legislation based on its specifics. There are a range of considerations for example emergency health care for a dying child to grants for public universities.
Paur, Gary	1	House	R	Absolute!
Paur, Gary	4	House	R	The question is unclear to me.
